Inspiring Innovation • Persistent Perfection

### BM6360 Advanced Data-Asset Management

#### Smart Performance

Powered by top-grade components and technologies, the ASUS Pro BM6360 helps you easily multitask your office work. Models feature Intel® 2nd generation i3/i5/i7 processors with powerful integrated graphics and support for up to 16GB of DDR3 memory to best handle your workload.

#### Hassle-free Expandability

Modular design lets your business expand easily as needed, adding hard drives, memory, PCI cards, and USB devices. The easy-to-service chassis design helps maximize uptime, making upgrades and routine maintenance effortless.

#### Intel® vPro™

Intel® vPro™ processors offer extensive hardware management. Even with the computer powered off, users can remotely monitor, inspect, update, start up, and turn off hardware components. In the event of a viral infection, vPro™ technology automatically notifies IT staff and isolates the infected computer to keep the virus from spreading. \*Optional

#### Trusted Platform Module (TPM) Data Security\*

TPM offers a protected and encapsulated microcontroller security chip used for safeguarding internal data structures against real world threats. This ensures that information like keys, passwords and digital certificates remains safe from external attacks, physical theft and other types of intrusion. \*Optional

#### Stringent Quality Tests

All commercial models are tested to operate in the 0-50°C range and in even the most humid environments safely for over 70 consecutive hours. To simulate shipping, Pro Series products are dropped from different angles to ensure unwavering solid quality.

#### 100% Solid State Capacitors for Ultra Reliability

ASUS Pro desktops are made with the world's best motherboards and solid state capacitors. High-quality components provide utmost durability, improved longevity and enhanced thermal performance.

#### Up to 40% Energy Saving

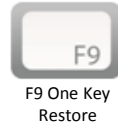

The exclusive ASUS EPU chip is the world's first PC energy saving controller, optimizing efficiency by detecting real time CPU loads and saving up to 40% on overall power consumption.

#### F9 One Key Restore

With the F9 single click, you can use the recovery partition quickly restores your Desktop PC's software to its original working state. (copying your data files and making note of any customized configuration settings before using the system recovery partition are required.)
