BM6AE Reliable, Secure, and Efficient Desktop Solution for Business Enterprise

Smart Performance

ASUS Pro Series desktops empowers easy multitasking and enhanced performance with new Intel® 4th generation Core™ processors, powerful graphics, and support for up to 32GB of DDR3 memory to best handle your workload.

Intel® vPro™ technology: Built-in security for greater protection

Optimized with optional 4th generation Intel® Core® vPro™ processor family, BM6AE supports Intel® vPro™ technology and Intel® Stable Image Platform Program (SIPP), targeting on large enterprises, providing remote manageability and reduce the total cost of ownership.

ASUS Business Suite 2.0: One Stop Management and Data Protection

The upgraded ASUS Business Suite 2.0 is an ideal one-stop management tool for IT administrators, allowing for easy system maintenance and providing utmost security.

Expand Your Desktop Workspace with Three Independent Displays

The BM6AE supports up to three independent displays, giving users the ability to expand their desktop workspace and multitask on three displays without the need for an additional VGA card.

Tool-less design for hassle-free upgradability and expandability*

The BM6AE features a modular design that offers more flexible support for hard drives, RAM, PCI cards, and USB devices — ideal for ever-expanding businesses. The serial and parallel ports are both optional, freeing up PCI slots for additional upgrades. An easy-to-service chassis design helps maximize uptime by making upgrades and routine maintenance effortless. *Optional

AI Security protects your data from unauthorized access and computer viruses

Management Information Systems can restrict users' access to confidential data, including enabling or disabling external USB devices or optical drives' data writing or reading capabilities. This also reduces the chances of incursions from viruses. It is integrated into the ASUS Business Suite 2.0 to provide complete control on unwanted devices management.

Trusted Platform Module (TPM) data security

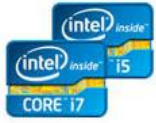

Onboard TPM offers a protected and encapsulated micro-controller security chip for safeguarding internal data structures against real world threats. This ensures that information like keys, passwords, and digital certificates remains safe from external attacks, physical theft, and other types of intrusion. *excludes Russia and China markets

100% solid capacitors

ASUS Pro Series desktops are made with the world's best motherboards and employ premium solid capacitors. High quality components provide utmost durability, improved longevity, and enhanced thermal performance.
