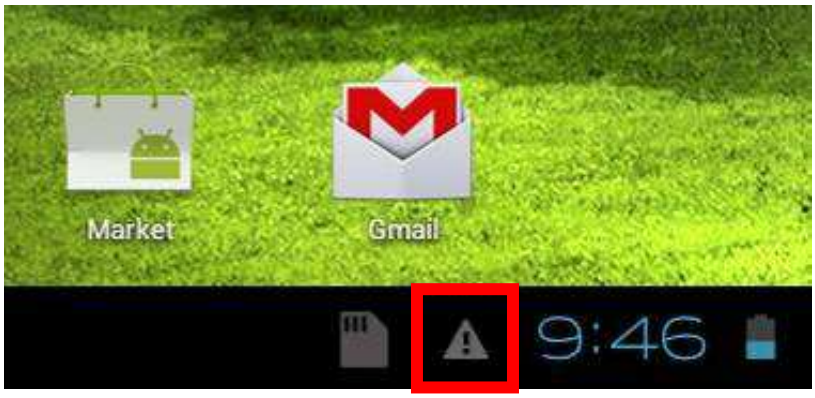
Update Android Firmware for ASUS Transformer AiO P1801

1. Check the Android version of your ASUS Transformer AiO P1801 by going to:
   [Settings] -> [About tablet] -> Build number
   Example: You should be able to see the build number WW_xxxxxxxxxxx, where “WW” means SKU.
2. Download the update file for ASUS Transformer AiO P1801 from the ASUS website under the manual section. The file name should be:
   P1801-XX_epad-user-1G-mdpi-tvdpi-hdpi-10.4.5.45-20130326-1646-UpdateLauncher
   where XX refers to the SKU of your ASUS Transformer AiO P1801.
3. Unzip the file and there will be an “XX_epad-user-10.4.5.45.zip” file in the unzipped folder. Put this ” XX_epad-user-10.4.5.45.zip” file to the root directory of your SD card.
4. With the Tablet turned on, insert the SD card with ” XX_epad-user-10.4.5.45.zip” file folder into the Tablet.
5. An exclamation mark will appear at the bottom of home screen next to the system clock. Tap the exclamation mark.



6. A pop-up message “System Update File Detected” would appear. Tap the “System Update File Detected” message.
