# Unlock tool SOP

1. Install unlock tool APK.
2. Connect with internet.
3. After you click "agree", please help to click "Press to unlock your device".

4. Click OK.

5. If you see the message "failed to unlock to your device, please try again later", please help to reboot the device and open the unlock tool APK again.

6. After installing successfully, the device will reboot and you can see the screen with black ASUS logo and white background.
