

Intel® PRO/10/100/1000/1000 Software Release 2.1 Gold+CAT Release Features

Build V101C0003, TIC 111169 Build Date 09/12/05

- **Support for the Ophir 82571EB silicon**
 - The Ophir Intel® PRO/1000 PT (copper) and Intel® PRO/1000 PF (fiber) Dual Port Network connections are dual-port gigabit Ethernet connections with PCI Express interfaces. It is the sixth generation of Intel Gigabit Ethernet controllers and will serve as Intel's flagship controller for dual port server designs.
- **Support for the Rimon 82572EI silicon**
 - The Rimon Intel® PRO/1000 PT (copper) and Intel® PRO/1000 PF (fiber) Network Connections are single port gigabit Ethernet connections with PCI Express interfaces. It is the sixth generation of Intel Gigabit Ethernet controllers and will serve as Intel's flagship controller for single port server designs.
- **Support for the Vidalia 82573L silicon**
 - The Vidalia Intel® PRO/1000 PL Network Connection is a 10/100/1000 Mbps low power solution for mobile and desktop that doesn't require AMT management capabilities.
- **Support for the following New Network Adapters:**
 - **Intel® PRO/1000 PT Dual Port Server Adapter (Redwater)**
The Intel® PRO/1000 PT Dual Port Server Adapter is a dual-port Gigabit copper Ethernet adapter with a PCI Express interface designed for server implementations.
 - **Intel® PRO/1000 PF Dual Port Server Adapter (Bretona)**
The Intel® PRO/1000 PF Dual Port Server Adapter is a dual-port Gigabit fiber Ethernet adapter with a PCI Express interface designed for server implementations.
 - **Intel® PRO/1000 PT Server Adapter (Glyndon)**
The Intel® PRO/1000 PT Server Adapter is a single-port Gigabit copper Ethernet adapter with a PCI Express interface designed for server implementations.
 - **Intel® PRO/1000 PT Desktop Adapter (Coney Island)**
The Intel® PRO/1000 PT Desktop Adapter is a single-port Gigabit copper Ethernet adapter with a PCI Express interface designed for desktop implementations
 - **Intel® PRO/1000 PF Server Adapter (Sheepshead Bay)**
The Intel® PRO/1000 PF Server Adapter is a single-port Gigabit fiber Ethernet adapter with a PCI Express interface designed for server implementations
- **Teaming support for our Lakeway 10GbE adapters has been expanded to include both Fault Tolerance and Adaptive Load Balancing.**
- **Fixing of selected bugs**
- **Localization of all changes**
