DDR3 1866 Qualified Vendors List (QVL)

Vendors	Part No.	Size	SS/DS	Chip Brand	Chip NO.	Timing	Voltage	M socket support (Optio	
								1 DIMM	2 DIMM
G.SKILL	F3-1866C10S-4GRSL	4GB	DS	SEC 219 HCH9	K4B2G0846C	10-10-10-32	1.35V		•
CORSAIR	CMSX8GX3M2A1866C10	4GB	DS	-	PEB12-15E	-	1.35V		•
PATRIOT	CT102464BF1339.C16FER	8GB	DS	-	-	10-10-10-32	1.35V		
	BLS8G3N18AES4.16FER	8GB	DS	-	-	10-10-10-30	1.35V		

2 DIMM Slots

- **1 DIMM:** Supports one module inserted in any slot as Single-channel memory configuration
- **2 DIMM:** Supports 2 modules inserted into both the **blue** or **black** slots as two pairs of Dual-channel memory configuration

-When installing total memory of 4GB capacity or more, Windows 32-bit operation system may only recognize less than 3GB. Hence, a total installed memory of less than 3GB is recommended.

-It is recommended to install the memory modules from the slots for better overclocking capability.

-The default DIMM frequency depends on its Serial Presence Detect (SPD), which is the standard way of accessing information from a memory module. Under the default state, some memory modules for overclocking may operate at a lower frequency than the vendor-marked value.
