INTRODUCTION

This release notes document describes HYDRALOGIX 200 driver version 1.6.109 for Microsoft Windows Vista & Windows 7. The document describes added features, performance improvements, bug fixes and known bugs in this driver version.

HYDRALOGIX 200 RELEASE UPDATES

This chapter describes new features, performance improvements and pending issues for version 1.6.109. In addition there is a detailed description of resolved and open issues for this version.

What's New in Version 1.6.109

- Improved performance
- Increase the number of supported games in 3 GPUs mode

Changes in version

The following sections list the changes made and issues resolved since driver version 1.6.108

Fixed Issues:

- Improve performance in mid and low range GPUs:
 - Starcraft II
 - Far Cry 2 in A-Mode and N-Mode
 - Call of Duty 6 – Modern Warfare 2

Open and known issues in this driver version

The following are the open issues with current driver release:

- No support for windowed mode
- It is recommended that the display screen will be connected to the stronger GPU
- To use Nvidia PhysX with HYDRALOGIX, go to the Nvidia control panel and chose to run PhysX on the auxiliary GPU (the GPU that is not connected to display screen)
- Running games that support both DX11 and DX10 on a DX10 GPU may cause the HYDRALOGIX icon to show indication of a DX11 game.
- Tri GPUs mode is best performed with 3 identical GPUs
- ALT+TAB option is not supported
- Running FutureMark and Unigine benchmarks while FRAPS application is active may cause crashes (occurs also when HYDRALOGIX driver is disabled)
- In some games, there is no way to remove HYDRALOGIX driver logo through the control panel
- While the HYDRALOGIX driver is installed and the user runs in Crossfire 4 GPUs mode, some games may crash

Games Qualified

Games that passed quality tests are added to the games list per each A / N / X mode.

NOTES:

- Running a game that without adding it to the driver's control panel list will automatically default operation of a single GPU, the one connected to screen, to ensure quality of service
- Manually adding games does not guaranty optimized performance or game-play

Games supported in this version

No	Game/Benchmark	Dual GPUs	Tri GPUs	Notes
1	3DMark06	✓	✓	
2	3DMark Vantage	✓	✓	Flickering images in first test in X-Mode
3	Assassin's Creed	✓		
4	Assassin's Creed 2	✓		Hick-ups may appear in A-Mode

Supported Operating Systems

The HYDRALOGIX 200 Release supports:

- Microsoft Windows® Vista (SP2) 32-bit and 64-bit
- Microsoft Windows® 7 OS 32-bit and 64-bit

Microsoft Windows® Editions include:

- Windows Vista Home Basic
- Windows Vista Home Premium
- Windows Vista Business
- Windows Vista Enterprise Edition
- Windows Vista Ultimate
- Windows 7 Home Premium
- Windows 7 Professional
- Windows 7 Ultimate

The HYDRALOGIX 200 driver supports the following languages in the main driver Control Panel:

English (USA)

Supported graphic libraries

The HYDRALOGIX 200 driver supports the following graphic libraries:

- DirectX 9
- DirectX 10/10.1
- DirectX 11

Supported graphics cards and display drivers

The HYDRALOGIX 200 driver supports the following graphics cards and drivers:

N-Mode

- Graphics cards GF 9xxx/GF 2xx/GF 4xx series
- NVIDIA display drivers: All

A-Mode

- Graphics cards HD4XXX & HD5XXX series
- ATI/AMD display drivers: All

X-Mode

- Graphics cards
 - Nvidia GF 9xxx/GF 2xx series/GF 4xx series
 - AMD/ATi HD4xxx Series & HD5XXX series
- Display drivers:
 - Nvidia:All
 - AMD/ATi: All

Installation

Minimum Hard Disk Space

The hard disk space requirements are a minimum of 15 MB for English-only, and 20 MB for International.

Before You Begin

Please uninstall your older driver version before installing 1.6.109 (happens automatically)

Please refer to <http://www.lucidlogix.com/driverdownloads.html> to download the latest available HydraLogix drivers.

Installation Instructions

1. Run the HYDRALOGIX 200 install file to launch the Installation Wizard.
2. Follow the instructions in the Installation Wizard to complete the installation.
3. Click Finish.
- 4. Restart the computer**

General Tips

- In all Modes - higher settings result with better performance
 - Turn AA ON
 - Resolution 1920 x1200 or higher is recommended
 - High game settings
- In non-identical A & N modes and in X mode
 - Different graphics card manufacturers – ok (e.g. MSI + Other vendor)
 - Different graphics card memory size and type – ok (e.g. 512MB + 1.76Gb)
 - Overclock and non-overclock graphics cards - ok
 - Multi GPU performance ratio should be between 1:1 and 1:2
 - It is best that the display will be connected to the stronger GPU

Common mistakes

- Not using latest HYDRALOGIX driver
- Trying to run non-qualified graphics card combinations
- Running non-qualified games

Remark: When a non qualified graphics card combination or game is running – the game will default to the GPU connected to the screen, ensuring quality of service
