ASUS RS300-E10 series is an Intel® Xeon® E processor 1U rack server based on Intel® C242 chipset. RS300-E10 Series has high expandability with 2 expansion slots in a configuration. This flexible expansion offers diverse applications in graphic, storage and networking to meeting the demands of future expansion.

Target market

- Data center, front-end server
- Firewall, gateway server
- SMB print/file/mail/exchange server
- Surveillance

Fruitful Storage I/O Expandability

- Native 6 SATA 6G onboard
- M.2 (NGFF, Gen3 x2) for independent OS drive
- 2 x PCI-E x8 Link enable extreme flexibility

Comprehensive IT infrastructure management solution

Optional ASMB9-iKVM and ASUS Control Center (ACC*)

High networking connection

RS300-E10 Series with quad server-class Intel® LAN controllers, which doubles queues compared to previous-generation. This is better for virtualization applications. In addition, the quad LAN teaming quadruples the network bandwidth and the failover function ensures uninterrupted network connections.

Dual M.2 unleash independent and redundant I/O for OS drive

Capacity up to 2TB M.2 is supported for RS300-E10 series, either SATA and PCIe source can be auto by switch. The design with dual M.2 is capable of RAID 0, 1 and bring up better back-up solution for internal OS drive.

Versatile storage capability

RS300-E10 Series is the perfect choice for an operating system or application drive, making the server work as fast as possible. ASUS further furnishes several choices for OS drive placement, such as M.2 (dual, up to 512GB x 2), SSD cage and SATA DOM. For disk storage, it can offer four 3.5" hot-swap disk bay and two internal 2.5" SSD bay (optional).
